Accelerating the pathway to scale for an email cybersecurity company

We partnered with SMX to modernise their Azure environment which will see 500,000+ mailboxes migrated to Azure. Parallo have become a trusted advisor on a variety of projects, providing proof of and ongoing governance – overall helping to improve their processes and platform.

Outcomes:

- **Streamlined Governance:** Lead quarterly governance reviews and provided recommendations for process improvements.

- **Improved Platform:** Implemented Azure landing zone for all SMX platforms.

- **Skill Development:** Facilitated Infrastructure-as-Code (IaC) and DevOps workshops, empowering SMX teams with automation and agile methodologies

"Parallo's expertise across sectors and size of orgs different to our own enabled us to design systems of scale and security with current best practices. Something we would not have been able to achieve at the same level or speed on our own."

"Parallo have always acted in the best interests of us – the customer. Pro-actively bringing ideas and solutions, even if they mean needing less input from Parallo to execute."

"[The] Parallo people are not only knowledgeable, but personable. Easily able to integrate into existing teams with little fuss or disruption."

Mark Bailey, SMX | CTO
